where  $\hbar$  is the reduced Planck constant,  $h/(2\pi)$ . Historically, the uncertainty principle has been confused with a somewhat similar effect in physics, called the observer effect, which notes that measurements of certain systems cannot be made without affecting the systems, that is, without changing something in a system. Heisenberg utilized such an observer effect at the quantum level (see ...

Update; September 16, 2016: We have been getting some posts documenting the harassment of citizens by local authorities in regards to collecting rain water. I've checked these out to the best of my ability, and found most of them to be somewhat accurate. On this blog I do not intend to focus on taking a political stance on the legality or morality of rain water harvesting.
