### **USING COPULAS An introduction for practitioners**

In probability theory and statistics, a copula is a multivariate probability distribution for which the marginal probability distribution of each variable is uniform. Copulas are used to describe the dependence between random variables. Their name comes from the Latin for "link" or "tie", similar but unrelated to grammatical copulas in linguistics [citation needed].

In linguistics, a copula (plural: copulas or copulae; abbreviated cop) is a word used to link the subject of a sentence with a predicate (a subject complement), such as the word is in the sentence "The sky is blue." The word copula derives from the Latin noun for a "link" or "tie" that connects two different things.. A copula is often a verb or a verb-like word, though this is not universally ...

ABSTRACT. The role of operational risk in the 2007/2008 financial crisis is explored. The factors that gave rise to the crisis are examined and it is found that although the event is largely regarded as a credit crisis, operational risk factors played a significant role in fuelling its duration and severity.

1. Introduction. Total Cost of Ownership (TCO) is a well-known approach for analysing supplier performance and more specifically efficiency defined as the total quantity of resources (inputs) that need to be expended to obtain a given quantity of goods or services from a supplier (outputs). TCO takes into account all the activities carried out by a firm to manage a supply relationship.
