\* A Rand Corporation study tracked the healthcare spending of 2,756 families over periods of either three or five years during 1974-1982. The families were given insurance plans that covered all healthcare expenses above \$1,000 per year or a reduced amount for lower-income families so that healthcare expenses could never exceed certain portions of their income.

A multiple birth is the culmination of one multiple pregnancy, wherein the mother delivers two or more offspring. A term most applicable to placental species, multiple births occur in most kinds of mammals, with varying frequencies. Such births are often named according to the number of offspring, as in twins and triplets. In non-humans, the whole group may also be referred to as a litter, and ...
