Chapter I: Welcome to static code analysis, that thing you aren't doing "The quality of your code is a weak spot in almost every software project you'll ever touch. This is because ongoing development ensures that even the bits you were once proud of become, over time, first less elegant, then rough, and finally incomprehensible."

Not everything works for content type application/json.. If you are using Ext JS form submit to upload file, be aware that the server response is parsed by the browser to create the document for the <iframe>.. If the server is using JSON to send the return object, then the Content-Type header must be set to text/html in order to tell the browser to insert the text unchanged into the document body.

What is the correct JSON content type? - Stack Overflow
